- Made from 70% non-GMO compostable plastic and 30% talc
- Composts in 2-5 months in a commercial composting facility
- Suitable for food up to 200°F

UTENSILS

| Item Number | Description | Quantity/ Sleeve | Quantity/ Case |
|-------------------|--|---------------------|-------------------|
| UT-CSTX | 9" Bamboo Chopsticks - White Paper Wrapped | 50 | 1000 |
| UT-FK | Fork -Compostable | 50 | 1000 |
| UT-KN | Knife -Compostable | 50 | 1000 |
| UT-SP | Spoon -Compostable | 50 | 1000 |
| UT-W-F | 6.3" Fork- WRAPPED | | 750 |
| UT-W-K | 6.7" Knife- WRAPPED | | 750 |
| UT-W-S | 6.0" Spoon- WRAPPED | | 750 |
| UT-S-AS | Asian Soup Spoon -Compostable | 25 | 500 |
| UT-S-LG | SOUP Spoon -Compostable | 50 | 1000 |
| UT-SET-N | Fork/Knife/Spoon/Napkin Combo -Compostable | 250 | 250 |
| UT-SET-FKN | Fork/Knife/Napkin Combo -Compostable | 500 | 500 |
| UT-SPK | SPORK -Compostable | 50 | 1000 |
| UT-SIP-SPK | Reusable Bamboo Spork with SIP Logo | 1 | 1 |
| UT-TS | Taster Spoon 3" Cold Only -Compostable | 200 | 3000 |

PIZZA BOXES

- Eco-friendly pizza box made from 100% recycled material
- Plain kraft with custom print options available

PIZZA BOXES

| Item Number | Description | Quantity/ Sleeve | Quantity/ Case |
|--------------|---------------------|---------------------|-------------------|
| PB-10 | 10" Pizza Box 50ct. | 50 | 50 |
| PB-12 | 12" Pizza Box 50ct. | 50 | 50 |
| PB-14 | 14" Pizza Box 50ct. | 50 | 50 |
| PB-16 | 16" Pizza Box 50ct. | 50 | 50 |
| PB-18 | 18" Pizza Box 50ct. | 50 | 50 |

BAGS

- Compostable and Biodegradable bags
- Compostable bags are made from mixture of synthetic and starch-based plastics and are certified for at home composting.
- Available in additional sizes upon request.

| Item Number | Description | Quantity/ Sleeve | Quantity/ Case |
|-----------------|--|---------------------|-------------------|
| BG-PR-BB | Compostable Produce Bag 11 x 17 | 800 | 3200 |
| B-3 | 17.7x16.9x.6mil - 3 Gallon Compost Bag | 50 | 500 |
| B-13 | 23x29x.6 - 13 Gallon Tall Kitchen Bag | 20 | 200 |
| B-33 | 33x39" - 33 Gallon Bag | 10 | 150 |
| B-45 | 52x34.3 - 45 Gallon Compostable Liner | 10 | 100 |
| B-55 | 36x55" - 55 Gallon Compostable Liner | 10 | 100 |
| B-T-Bio | BIO T-Shirt Bag (13x8x21) | 50 | 500 |

WASARA

- Fully Compostable and made from all tree-free materials, specifically, bamboo and bagasse
- Aesthetic and functional, each piece is hand cut in Japan.

| Item Number | Description | Quantity/ Sleeve | Quantity/ Case |
|--------------|--------------------------------------|---------------------|-------------------|
| W-DM- BO | Bowl 16 oz | 50 | 200 |
| W-DM- DBO | Compote Designer Bowl 10 oz | 50 | 200 |
| W-DM- CU-LT | Large Tumbler 10 oz | 50 | 200 |
| W-DM- CU-WC | Wine Cup 8 oz | 50 | 200 |
| W-DM- CU-CC | Coffee Cup 4 oz | 50 | 200 |
| W-DM- CU-ST | Choko Small Tumbler 6 oz. | 50 | 200 |
| W-DM- Tri-AP | Triangular Appetizer Plate 6.5x9" | 50 | 200 |
| W-DM- LRP | Maru Large 9" Round Plate | 50 | 100 |

| W-DM- SRP | Maru Small Round 3.5" Square Plate | 100 | 400 |
| W-DM- SSP | Kaku Small Square 3.25" Square Plate | 100 | 400 |
| W-DM- MSP | Kaku Medium Square 6" Square Plate | 50 | 200 |
| W-DM- LSP | Kaku Large 8" Square Plate | 50 | 100 |
| W-DM-Ex LP | Kaku Extra Large 10" Square Plate | 50 | 100 |
| W-DM-OB | Oval Bowl 20 oz | 25 | 200 |
| W-DM-HB | Hachi Bowl 32 oz | 25 | 200 |
| W-DM-KT | Kozu Taster 2 oz | 50 | 400 |

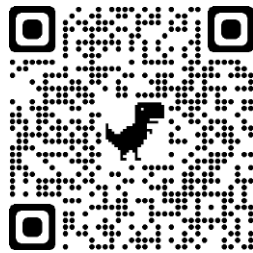

*THE LISTING OF PRODUCTS IN THIS CATALOG IS NOT A GUARANTEE OF AVAILABILITY. PLEASE CONTACT US TO ENSURE THE DESIRED ITEMS ARE CURRENTLY IN STOCK.

CUSTOM PRINT

- Custom printing is available on a variety of products, from round delis and cold cups, to hot cups, soup bowls and pizza boxes.

If you're looking to show off your brand, we are happy to help! Scan the QR code to learn more about what items we are able to create, as well as, minimum order quantities, color printing options, and file requirements, or contact your sales representative for more information.

WHY USE OUR PRODUCTS?

Composting FAQ

Biodegradable or Compostable?

The process is essentially the same, the speed of breakdown is what makes the two terms very different. Compostable means that the product will break down in under 12 weeks in an industrial composting facility. Biodegradable, has no set timeline to breakdown. A surf board is biodegradable; thus, the term biodegradable does not have any environmentally positive implications when used to describe to-go packaging or utensils.

What's the point if I can't compost it?

Our earth has finite resources. Disposables are used for such a short time, that using renewable resources, such as wheat straw, bagasse, or corn, makes perfect sense. And, although our state doesn't necessarily have the facilities in place to compost, increased compostable product usage, drives the need for change within our waste management system and allows us to work to build the facilities to support it.

What's the point of disposables being compostable?

Compostable disposables are designed to be mixed with food waste and composted in an industrial facility. This eliminates the need to sort, meaning the lids, cups, utensils, and clamshells with leftover rice and chicken katsu, can all go in the same bin together

What are composting conditions?

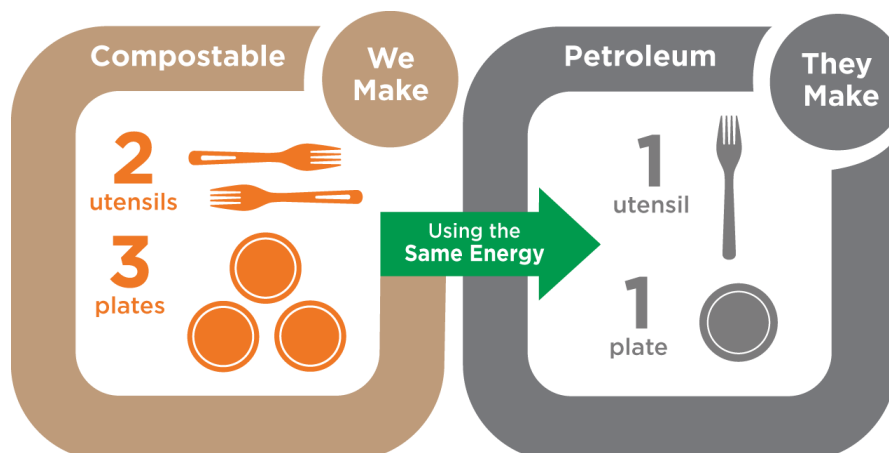

Compostable packaging has to be in composting conditions in order to breakdown. Industrial facilities provide the perfect combination of moisture, heat, and microbes to breakdown compostable disposables alongside food waste.

Although compostable disposables may be composted at home (we've seen successful home composting of both PLA and Fiber). The success of at home composting depends on the skill of the householder to maintain the right temperature, moisture, and heat. Therefore, we do not guarantee the successful composting of our products at home.

What's wrong with recyclables?

The word recyclable typically has a positive response in people minds. However, the reality is that less than 10% of the plastics are actually recycled in the US. Furthermore, plastic can only be recycled once, and it is typically recycled into something of lower quality because the polymers break down in the recycling process. In addition, 25% of items placed in recycling bins are sent to the landfill due to the contamination. The moral of the recycling story?

Food waste + plastic = not recyclable.
